

General Idea

A quick method for students to create their own books, specific to their level study guides, using technology.

Student will-

- Open a browser
- Open tab with Ask.com
- Open second tab with Answers.com
- Open MS Word

Students define terms using answers.com The results of the search are pasted in word. Students search content in ask .com and paste results in word (pictures and text.)

By using some formatting and graphic arts techniques students can cover a number of technology standards. This technique works well for most content areas and will work with Power Point as well. This allows for hard copy or presentations.

General Result
